The cooking gas cylinder costs more, and the poorest get less help

In May 2014, when the President appointed Shri Narendra Modi as Prime Minister, a Delhi household paid Rs 414 for a subsidised cylinder. PPAC's price build-up puts the 14.2 kg cylinder at Rs 942 in Delhi on 1 October 2026. That is Rs 528 more, a rise of 127.5 per cent. The price reached Rs 942 on 7 June 2026, the highest retail price since August 2023. The Ministry gives Rs 942 as the effective cost for a household outside the Ujjwala scheme. In 2026 the Government cut the Ujjwala subsidy of Rs 300 a refill to 4 refills a year, down from 9 in 2025-26. Yet the Ministry told the Lok Sabha that an Ujjwala connection took 4.71 refills on average in 2025-26, the most in the five years it reported.

No retail price of the household cylinder in Delhi between 30 August 2023 and 6 June 2026 was as high as Rs 942. The retail prices the Ministry gave Parliament for that period were Rs 903 on 1 January 2024, Rs 803 on 1 August 2024, Rs 853 on 16 July 2025 and Rs 913 from 7 March 2026.

Rs 942

a 14.2 kg household cylinder in Delhi from 7 June 2026, and in PPAC's price build-up of 1 October 2026, against Rs 414 for a subsidised cylinder in May 2014

Every price in this brief is the Government's own, as the Ministries gave them to Parliament or published them. This brief is dated 27 October 2026, before the oil companies' revision of 1 November 2026.

This brief reads the prices of the household and commercial LPG cylinders and of aviation fuel, as the Ministries of Petroleum and Natural Gas and of Civil Aviation gave them to Parliament, with PPAC's report on LPG consumption for August 2026. It looks at what households pay, and at Ujjwala households first of all.

What the Government's own figures show

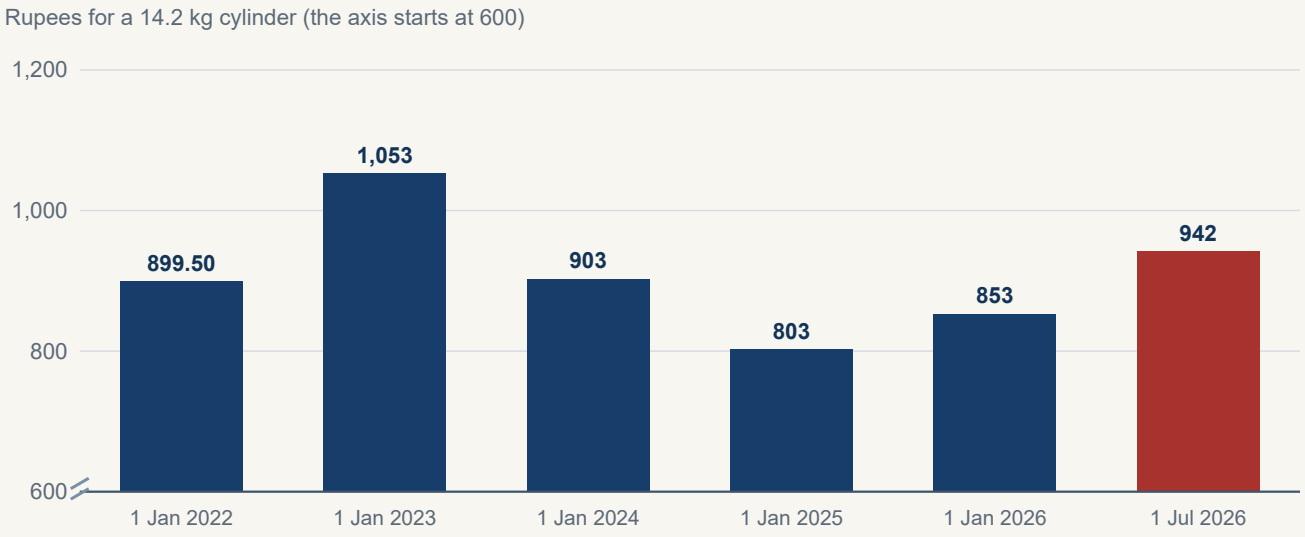

In May 2014, when the President appointed Shri Narendra Modi as Prime Minister, a Delhi household paid Rs 414 for a subsidised cylinder. PPAC's price build-up puts the 14.2 kg cylinder at Rs 942 in Delhi on 1 October 2026. That is Rs 528 more, a rise of 127.5 per cent. The price reached Rs 942 on 7 June 2026, the highest retail price since August 2023. The Ministry gives Rs 942 as the effective cost for a household outside the Ujjwala scheme. In 2026 the Government cut the Ujjwala subsidy of Rs 300 a refill to 4 refills a year, down from 9 in 2025-26. Yet the Ministry told the Lok Sabha that an Ujjwala connection took 4.71 refills on average in 2025-26, the most in the five years it reported.

Finding	What the Government's own figures show
The household cylinder	The household cylinder in Delhi went up to Rs 942 on 7 June 2026, the highest retail price since August 2023. PPAC's price build-up gives the same Rs 942 on 1 October 2026. The rise was the same in each of the four metros.
Ujjwala households	The limit of subsidised refills fell from 9 a year in 2025-26 to 4 in 2026. The most subsidy that an Ujjwala household can receive in a year therefore fell from Rs 2,700 in 2025-26 to Rs 1,200 in 2026. A subsidised refill cost Rs 642 in July 2026, against Rs 553 in November 2025.
Since May 2014	From 1 April 2014 each consumer could buy 12 subsidised cylinders a year, and in May 2014 a Delhi household paid Rs 414 for each one. On 1 October 2026 PPAC's price build-up puts the cylinder at Rs 942, which is 2.3 times as much.
The commercial cylinder	The 19 kg cylinder cost Rs 1,691.50 in Delhi on 1 January 2026. On 7 June 2026 it cost Rs 3,113.50, the Ministry said. That is 84.1 per cent more.
Fewer cylinders	PPAC's consumption report for August 2026 says that 14.4 crore household cylinders of 14.2 kg were delivered that month, against 17.1 crore in August 2025. Ujjwala households used 22.7 per cent less LPG than a year earlier.
Airlines and households	On 3 June 2026 the Cabinet approved one-time support of up to Rs 10,000 crore, which goes to the oil companies. In the same year the Government cut the subsidised refills of an Ujjwala household, which fell from 9 a year to 4.

The household cylinder in Delhi

The price in Delhi was Rs 1,103 from 1 March 2023, Rs 903 from 30 August 2023 and Rs 803 from 9 March 2024. By 16 July 2025 it had risen to Rs 853. It then rose twice in 2026, by Rs 60 to Rs 913 from 7 March and by Rs 29 to Rs 942 from 7 June.

Each bar is the price of a 14.2 kg household cylinder in Delhi on the date beneath it, from Indian Oil's table in the Ministry's answer of 20 July 2026. The red bar is 1 July 2026. The axis starts at Rs 600, so the bars show the differences more clearly.

Date	What happened	Price of a 14.2 kg cylinder
1 March 2023	Price in force	Rs 1,103
30 August 2023	Price from that day	Rs 903
9 March 2024	Price from that day	Rs 803
1 August 2024	Price the Ministry reported	Rs 803
16 July 2025	Price the Ministry reported	Rs 853
7 March 2026	Rise of Rs 60	Rs 913
7 June 2026	Rise of Rs 29	Rs 942
10 August 2026	Held since June, the Ministry said	Rs 942
1 October 2026	PPAC's price build-up	Rs 942

The Ministry told Parliament on 6 and 10 August 2026 that the price had been held at Rs 942 since June 2026. PPAC's price build-up gives the same Rs 942 on 1 October 2026. In 2026 the price rose by 10.4 per cent between 1 January and 1 July.

No retail price of the household cylinder in Delhi between 30 August 2023 and 6 June 2026 was as high as Rs 942. The retail prices the Ministry gave Parliament for that period were Rs 903 on 1 January 2024, Rs 803 on 1 August 2024, Rs 853 on 16 July 2025 and Rs 913 from 7 March 2026.

Rajya Sabha Unstarred Question 2527, 10 August 2026. Rajya Sabha Unstarred Question 128, 20 July 2026. PPAC, Snapshot of India's Oil and Gas data, October 2026, file of 16 October 2026.

A national check: the price index for LPG and piped gas

MoSPI's consumer price index has one item for LPG cylinders and piped natural gas together, and it covers all India rather than Delhi alone. On the 2024 base the item stood at 104.31 in May 2026 and 106.71 in June. In September 2026 it stood at 107.13, 0.4 per cent above June.

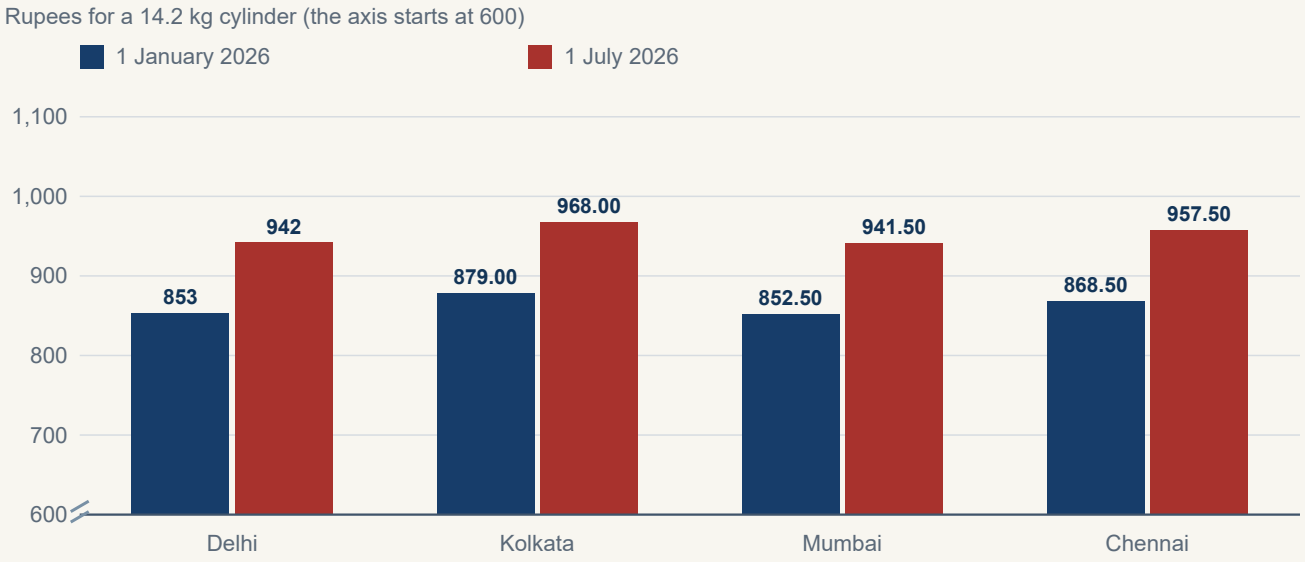

Month	Index, LPG cylinder and piped natural gas, all India (2024 = 100)
May 2026	104.31
June 2026	106.71
July 2026	106.80
August 2026	107.10
September 2026	107.13

The item pools LPG cylinders with piped natural gas and covers the whole country, so it is a check on the Delhi price and not a Delhi price.

Sources: Read on 22 October 2026. MoSPI, consumer price index for May 2026. MoSPI, consumer price index for June 2026. MoSPI, consumer price index for July 2026. MoSPI, consumer price index for August 2026. MoSPI, consumer price index for September 2026.

The same rise in all four metros

The rise was the same in each of the four metros. Between 1 January and 1 July 2026 the price went up by Rs 89 in Delhi, Kolkata, Mumbai and Chennai alike, as Indian Oil's table in the Ministry's answer shows.

Each pair of bars is one city, with 1 January 2026 in navy and 1 July 2026 in red. Every city's price rose by the same amount.

City	1 Jan 2022	1 Jan 2023	1 Jan 2024	1 Jan 2025	1 Jan 2026	1 Jul 2026
Delhi	899.50	1,053.00	903.00	803.00	853.00	942.00
Kolkata	926.00	1,079.00	929.00	829.00	879.00	968.00
Mumbai	899.50	1,052.50	902.50	802.50	852.50	941.50
Chennai	915.50	1,068.50	918.50	818.50	868.50	957.50

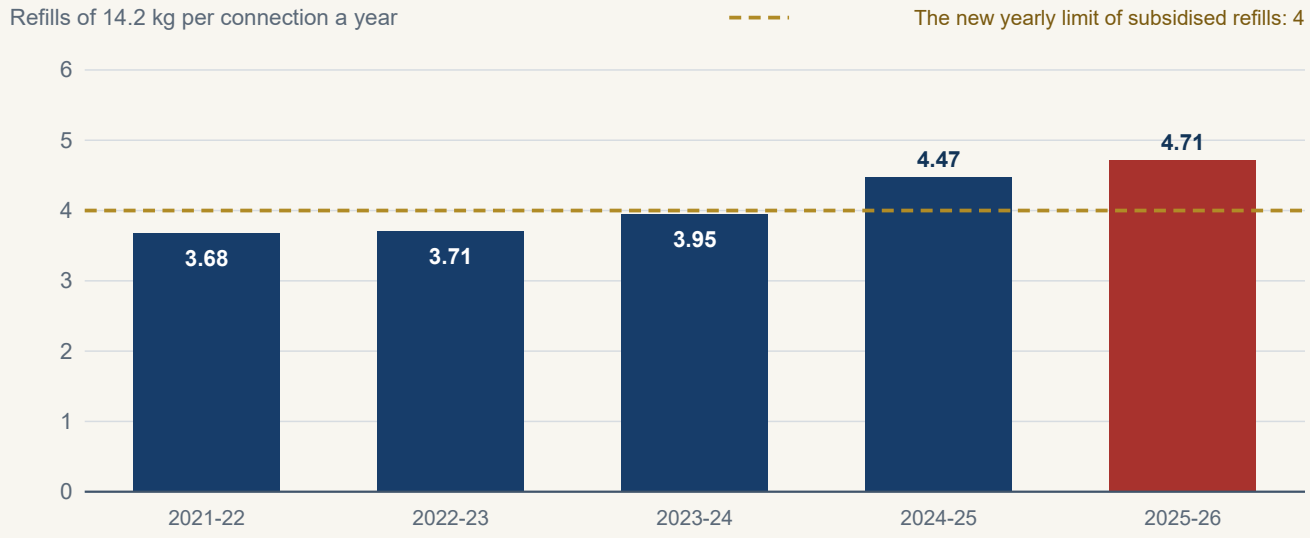

Rupees for a 14.2 kg cylinder, as Indian Oil's table prints them.

On 1 July 2026 the cylinder cost Rs 968 in Kolkata, Rs 941.50 in Mumbai and Rs 957.50 in Chennai.

Sources: Read on 22 October 2026. Rajya Sabha Unstarred Question 128, 20 July 2026.

Ujjwala: four subsidised refills where nine were allowed

The Ministry told the Lok Sabha on 23 July 2026 that it had revised a yearly limit. The limit is on subsidised refills for Ujjwala households, and it went from 9 cylinders to 4. It kept the subsidy at Rs 300 a cylinder. The most subsidy that an Ujjwala household can receive in a year therefore falls from Rs 2,700 to Rs 1,200.

Each bar is the average number of 14.2 kg refills an Ujjwala connection took in that year, in the Ministry's answer of 6 August 2026. The gold line marks the new limit of four subsidised refills.

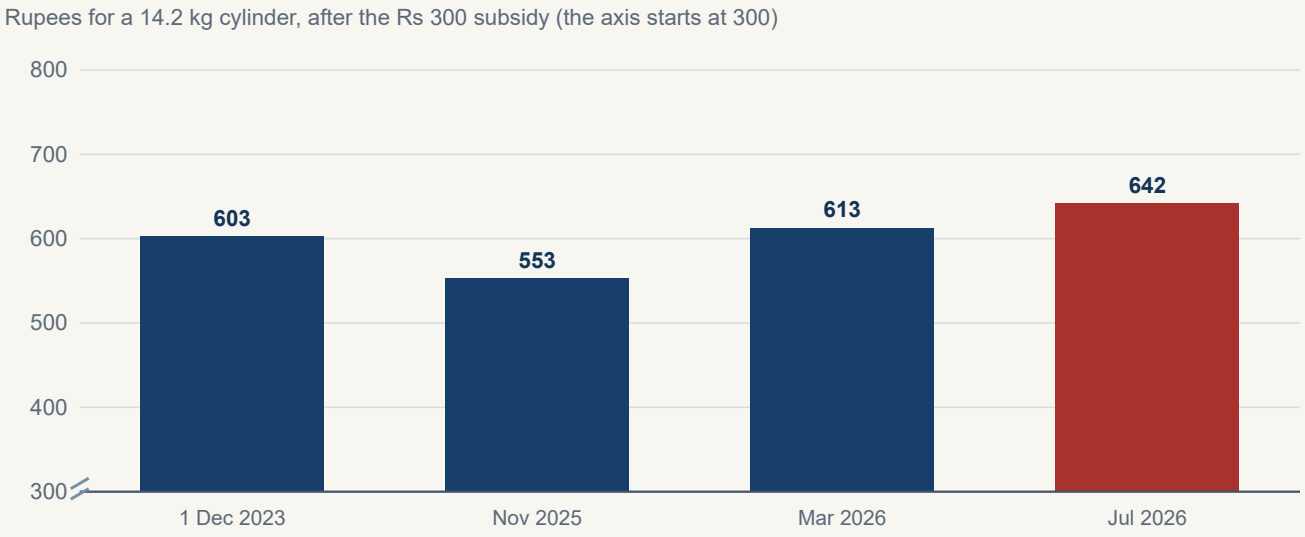

In the same session the Ministry gave the average for 2025-26 as 4.71 refills a connection. That is the highest of the five years in its table, which begins at 3.68 refills in 2021-22. The new limit of 4 sits 0.71 of a refill below the average of 2025-26, which was 4.71. The Ministry's own table shows that 4.85 crore Ujjwala consumers took more than four refills in 2025-26. That is 45.9 per cent of the 10.58 crore connections it counts for that year.

Year	Refills a connection took, on average	Ujjwala connections, crore
2021-22	3.68	8.99
2022-23	3.71	9.56
2023-24	3.95	10.33
2024-25	4.47	10.33
2025-26	4.71	10.58

Sources: Read on 22 October 2026. Lok Sabha Unstarred Question 757, 23 July 2026. Lok Sabha Unstarred Question 734, 23 July 2026. Lok Sabha Unstarred Question 3151, 6 August 2026. Rajya Sabha Unstarred Question 128, 20 July 2026. Lok Sabha Starred Question 175, 11 December 2025.

What an Ujjwala household pays

An Ujjwala household paid Rs 642 for a subsidised refill in Delhi in July 2026, after the subsidy of Rs 300 a refill. The price was Rs 553 in November 2025, so a subsidised refill rose by Rs 89, or 16.1 per cent. Every refill beyond the fourth costs the full Rs 942.

Each bar is the effective price of a subsidised 14.2 kg refill for an Ujjwala household in Delhi, as the Ministry reported it to Parliament. The axis starts at Rs 300.

Take an Ujjwala household that uses 4.71 refills in a year, the average for 2025-26. At the price of November 2025 its year's cylinders cost Rs 2,605, when up to nine refills carried the subsidy. At the prices of July 2026 it pays Rs 642 for each of four refills and Rs 942 for the rest, a total of Rs 3,237. That is Rs 632 more in a year, or 24.3 per cent.

	Price of November 2025	Prices of July 2026
Subsidised refills a year	up to 9	up to 4
Price of a subsidised refill	Rs 553	Rs 642
Price of any other refill	Rs 853	Rs 942
Cost of 4.71 refills in a year	Rs 2,605	Rs 3,237

The last row is this brief's own arithmetic on the Ministry's figures, for a household at the 2025-26 average.

Sources: Read on 22 October 2026. Rajya Sabha Unstarred Question 1739, 18 December 2023. Lok Sabha Starred Question 175, 11 December 2025. Rajya Sabha Unstarred Question 4134, 30 March 2026. Rajya Sabha Unstarred Question 128, 20 July 2026. Lok Sabha Unstarred Question 3151, 6 August 2026. Lok Sabha Unstarred Question 757, 23 July 2026.

Since May 2014

On 26 May 2014 the President appointed Shri Narendra Modi as Prime Minister. That month a Delhi household paid Rs 414 for a subsidised 14.2 kg cylinder. The Ministry's table of every revision shows that the price had been Rs 414 since 11 December 2013, and it lists no change to that price up to its answer of 13 August 2014. PPAC's price build-up puts the cylinder at Rs 942 in Delhi on 1 October 2026. That is Rs 528 more, or 127.5 per cent, and it is 2.3 times as much. The Ministry gives Rs 942 as the effective cost for a household outside the Ujjwala scheme, from 7 June 2026.

The first bar is the price of a subsidised cylinder in Delhi in May 2014. The second is the Delhi price in PPAC's price build-up of 1 October 2026.

When	Price of a 14.2 kg cylinder in Delhi
May 2014, including 26 May, subsidised cylinder	Rs 414
1 July 2014, subsidised cylinder	Rs 414
7 June 2026, the effective cost for a household outside Ujjwala, from that day	Rs 942
1 October 2026, PPAC's price build-up	Rs 942

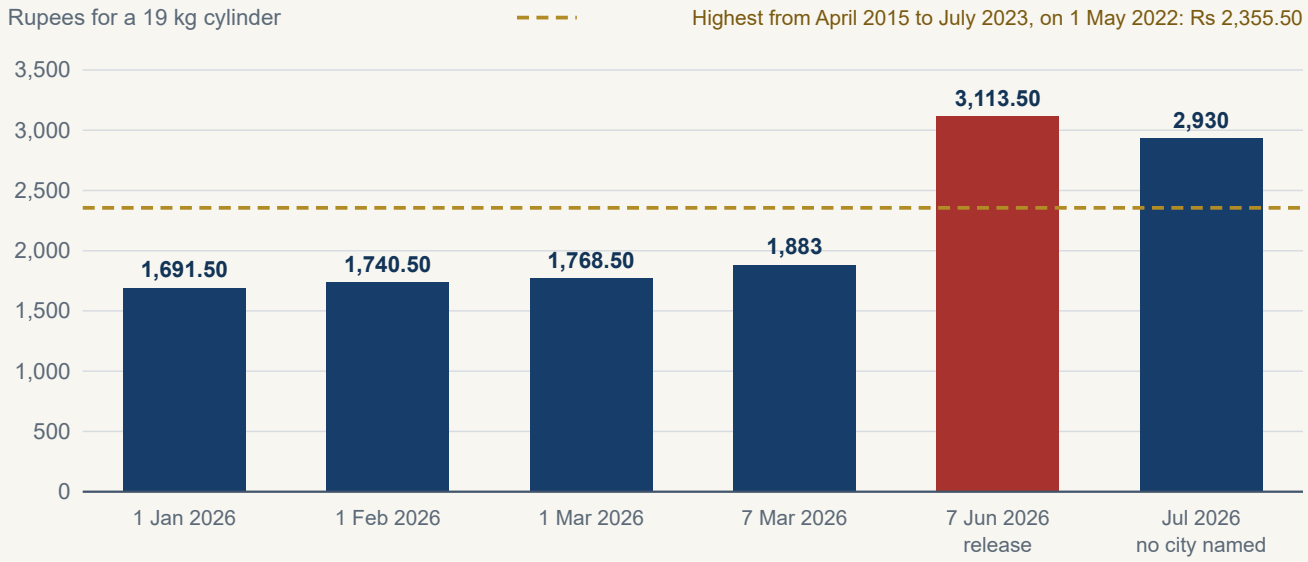

From 1 April 2014 each consumer could buy 12 cylinders a year at the subsidised price, as the Ministry told the Lok Sabha on 14 July 2014. In 2026 the targeted subsidy of Rs 300 a refill is for Ujjwala households, and it covers 4 refills a year.

Subsidised cylinders a year	Number
1 April 2014, each consumer, from that day	12
2026, an Ujjwala household	4

Sources: Read on 27 October 2026. Rajya Sabha Unstarred Question 3812, 13 August 2014. PIB, President's Secretariat, 26 May 2014. Lok Sabha Unstarred Question 585, 14 July 2014. PPAC, Snapshot of India's Oil and Gas data, October 2026, file of 16 October 2026. Lok Sabha Unstarred Question 757, 23 July 2026. Rajya Sabha Unstarred Question 128, 20 July 2026.

The commercial cylinder

The 19 kg cylinder used by hotels and restaurants cost Rs 1,691.50 in Delhi on 1 January 2026. The Ministry's release of 7 June 2026 says it sold in Delhi at Rs 3,113.50. That is 84.1 per cent more than on 1 January. The Ministry told the Lok Sabha on 30 July 2026 that the oil companies revised the price of a 19 kg cylinder to Rs 2,930 in July 2026, and its answer names no city. That price is 73.2 per cent above the Delhi price of 1 January.

Each bar is the price of a 19 kg commercial cylinder in Delhi, except the last, because the Ministry's answer gives the July 2026 price without naming a city. The red bar is the price in the release of 7 June 2026. The gold line marks the highest price in the Ministry's table of April 2015 to July 2023.

Date	Price of a 19 kg cylinder
1 January 2026	Rs 1,691.50
1 February 2026	Rs 1,740.50
1 March 2026	Rs 1,768.50
7 March 2026	Rs 1,883
7 June 2026, the Ministry's release	Rs 3,113.50
July 2026, no city named in the answer	Rs 2,930

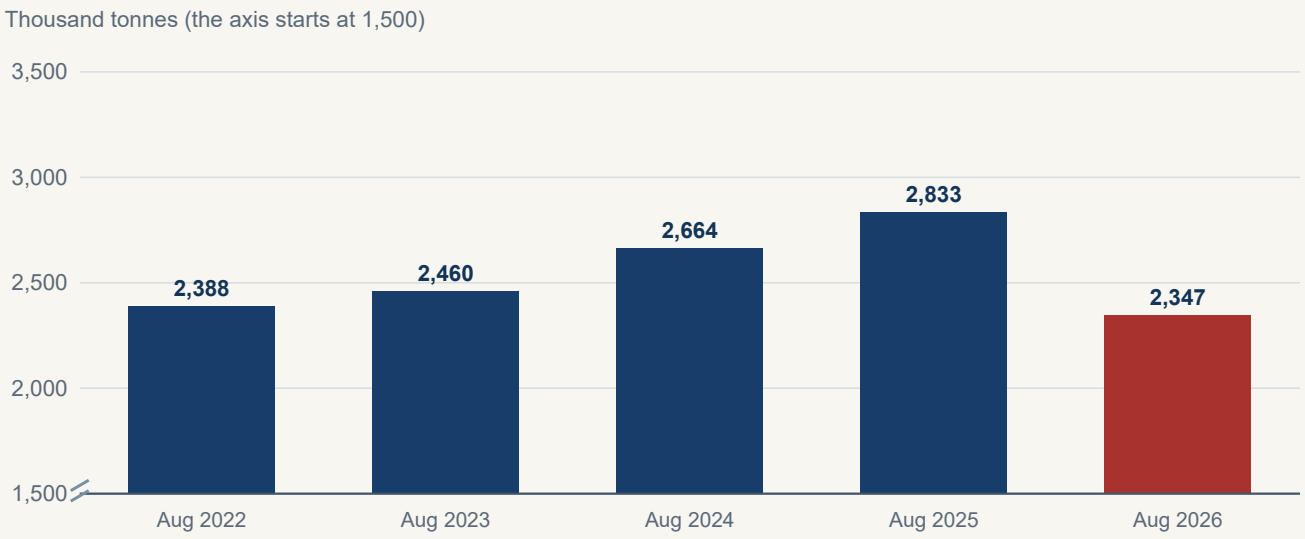

Every price in the table is for Delhi except July 2026, for which the Ministry's answer names no city.

The June price was Rs 758 above the peak of Rs 2,355.50 on 1 May 2022. That peak was the highest price in the Ministry's table of commercial prices, which runs from April 2015 to July 2023.

Sources: Read on 22 October 2026. Lok Sabha Unstarred Question 6426, 2 April 2026. PIB, Ministry of Petroleum and Natural Gas, 7 June 2026. Lok Sabha Unstarred Question 2033, 30 July 2026. Lok Sabha Starred Question 203, 3 August 2023.

Fewer cylinders reached kitchens

PPAC's consumption report for August 2026 says that 14.4 crore household cylinders of 14.2 kg were delivered that month, against 17.1 crore in August 2025. That is 2.7 crore fewer, or 15.8 per cent.

Each bar is India's LPG consumption in August of one year, in thousand tonnes, from PPAC's Table-10. The figure for 2026 is provisional. The axis starts at 1,500.

The same report puts packed domestic LPG consumption 15.9 per cent below August 2025. Consumption by Ujjwala households was 22.7 per cent lower. India used 2,347 thousand tonnes of LPG in August 2026. That is the lowest of the five Augusts in PPAC's table.

The Ministry told the Lok Sabha on 23 July 2026 that it had raised the booking interval. That interval became 25 days in urban areas, and up to 45 days in rural areas.

The Ministry's release of 19 September 2026 sets a condition, which applies from 1 October 2026. From that day a household must complete biometric Aadhaar authentication before it can book a refill at the regulated price with its subsidy. A consumer who is unwilling or unable to complete it, and registers that choice with the oil company, is supplied LPG at the market price, without any subsidy, in 5 kg or 10 kg cylinders. By 19 September, 27.43 crore active consumers, or 89.9 per cent, had completed it. On the release's own percentage, about 3.1 crore active consumers had not.

Sources: Read on 22 October 2026. PPAC, consumption report for August 2026. Lok Sabha Unstarred Question 757, 23 July 2026. PIB, Ministry of Petroleum and Natural Gas, 19 September 2026.

Aviation fuel: a stable price for airlines

On 3 June 2026 the Cabinet approved one-time support of up to Rs 10,000 crore, which goes to the oil companies. It is meant to give scheduled Indian airlines a stable price for aviation turbine fuel, which is called ATF. The support takes the form of interest-free advances to the oil companies. In the same year the Government cut the subsidised refills of an Ujjwala household, which fell from 9 a year to 4.

The Ministry of Civil Aviation told the Rajya Sabha on 20 July 2026 that, under this arrangement, one uniform FOB price of ATF, as the answer calls it, was applied across the country. It was Rs 86.32 a litre for domestic operations, and Rs 104.49 a litre for international operations. For April and May 2026 the Government capped the price of ATF for domestic flights. It could rise by at most 25 per cent over its level of 1 March 2026.

Measure for airlines in 2026	What the Government's sources say
Price stabilisation support	Up to Rs 10,000 crore, one-time
Form of the support	Interest-free advances to the oil companies
Uniform ATF FOB price, domestic operations	Rs 86.32 a litre
Uniform ATF FOB price, international operations	Rs 104.49 a litre
Cap on the domestic ATF price, April and May 2026	25 per cent over 1 March 2026
VAT on ATF in Delhi	cut from 25 per cent to 7 per cent for six months

Measure for Ujjwala households in 2026	What the Government's sources say
Subsidised refills a year	cut from 9 to 4
Subsidy a refill	Rs 300, unchanged

Sources: Read on 22 October 2026. PIB, Cabinet decision, 3 June 2026. Rajya Sabha Unstarred Question 7, 20 July 2026. Lok Sabha Unstarred Question 757, 23 July 2026. Rajya Sabha Unstarred Question 128, 20 July 2026.

What the revision of 1 November 2026 will be read against

The oil companies revise LPG and ATF prices on the first of each month, and the next revision takes effect on Sunday 1 November 2026. This brief fills in no figure for that day. The table gives the latest price the Government has stated for each item.

Item	The price applies to	The Government's latest statement of it	Price
Household cylinder, Delhi	from 7 June 2026	6 and 10 August 2026, the Ministry in Parliament	Rs 942
Household cylinder, Delhi	1 October 2026	PPAC's price build-up, Snapshot of October 2026	Rs 942
Household cylinder, Kolkata	1 July 2026	20 July 2026	Rs 968
Household cylinder, Mumbai	1 July 2026	20 July 2026	Rs 941.50
Household cylinder, Chennai	1 July 2026	20 July 2026	Rs 957.50
Ujjwala refill, Delhi, up to four a year	July 2026	20 July 2026, and again in August 2026	Rs 642
Commercial 19 kg cylinder, no city named	July 2026	30 July 2026	Rs 2,930
ATF for domestic operations, the uniform FOB price under the stabilisation arrangement	the arrangement approved on 3 June 2026	20 July 2026	Rs 86.32 a litre

The latest Government statement of the Delhi household price is PPAC's price build-up of 1 October 2026, which gives Rs 942. How long Rs 942 has held, and whether a new price on 1 November is the highest retail price since August 2023, also depend on the oil companies' notices of 1 August and 1 September 2026, which are not among this brief's sources. The notice of 1 November gives ATF in rupees a kilolitre for each city, so it can be read against Indian Oil's monthly base price at New Delhi only if the notice gives the same measure, and never against the FOB price of Rs 86.32 a litre. The Ministry last stated the limit of 4 subsidised Ujjwala refills a year on 10 August 2026, and a change in the price on 1 November would not by itself change that limit.

The Government's own figures put the household cylinder in Delhi at Rs 942 on 1 October 2026, which is 2.3 times the Rs 414 a household paid for a subsidised cylinder in May 2014. They also show the Ujjwala subsidy cut in 2026 to 4 refills a year. That is below the 4.71 refills an Ujjwala connection took on average in 2025-26.

PPAC, Snapshot of India's Oil and Gas data, October 2026, file of 16 October 2026. Rajya Sabha Unstarred Question 128, 20 July 2026. Lok Sabha Unstarred Question 2033, 30 July 2026. Rajya Sabha Unstarred Question 7, 20 July 2026.

Annexure: how the figures were made

Every price in this brief is the Government's own figure, which the Ministry of Petroleum and Natural Gas or the Ministry of Civil Aviation gave to Parliament, or a PIB release published. The Ministry's answers reproduce Indian Oil's price tables and the tables of the Petroleum Planning and Analysis Cell (PPAC), which is the Ministry's own office of statistics.

The household cylinder is the 14.2 kg domestic LPG cylinder, and its price is the retail selling price in Delhi unless a city is named. The commercial cylinder weighs 19 kg. An Ujjwala household is one that has a connection under the Pradhan Mantri Ujjwala Yojana (PMUY). Its effective price is what it pays after the targeted subsidy of Rs 300 a refill.

This brief works out four kinds of figure from the Government's own. They are the change between two prices and the change in per cent. They are also the cost of a year's refills for an Ujjwala household at the 2025-26 average, and the highest or lowest value of a series. The brief prints every other figure as the Government prints it.

The oil companies' monthly price notices of August, September and October 2026 are not among this brief's sources. Its latest household price is PPAC's price build-up of domestic LPG at Delhi as on 1 October 2026, and its other latest prices are those the Government stated in Parliament in July and August 2026.

MoSPI's consumer price index has one item for LPG cylinders and piped natural gas together, for all India. This brief uses it only as a check, because it is neither a Delhi price nor a price of the cylinder alone.

Term	What it means
Household cylinder	The 14.2 kg domestic LPG cylinder that a household buys for its kitchen. Its price here is the retail selling price in Delhi unless a city is named.
Commercial cylinder	The 19 kg LPG cylinder used by hotels, restaurants and other businesses, which the oil companies price separately each month.
Ujjwala	The Pradhan Mantri Ujjwala Yojana (PMUY), which gives LPG connections to women from poor households. Its households receive a targeted subsidy on a limited number of refills.
Effective price	What an Ujjwala household pays for a subsidised refill, which is the retail price less the targeted subsidy of Rs 300.
ATF	Aviation turbine fuel, the fuel that airlines buy, priced by the oil companies each month.
PPAC	The Petroleum Planning and Analysis Cell, the Ministry of Petroleum and Natural Gas's own office of statistics.

Each term above is used in the Government's own sense, as its answers in Parliament use it.
